- C
- MySQL
- PostgreSQL
- Web Development
- Data Analysis
- Machine Learning

LANGUAGES

- Chinese: Native
- English: Intermediate
- Japanese: Beginner

LICENSES

- iPAS Information Security Engineer (Level 1)
- Level B/C Technician in Computer Hardware Decoration

PROFILE

NTU M.S. student (B.S. in CSIE) specializing in LiDAR security and data protection. Expert in Web Development and AI implementation with award-winning project experience (Hackathon Best Design). Strong leader and proactive problem-solver committed to building scalable, real-world AI systems.

EDUCATION

National Taiwan University 2025/9 ~ Present
Engineering Science and Ocean Engineering

National Taipei University of Technology 2021/9 ~ 2025/6
Computer Science and Information Engineering

WORK EXPERIENCE

Winkler Partners 2024/7 ~ PRESENT
Software Engineering Intern

- Web Development
- Email Auto-Archiving System

Raygate Co., Ltd. 2025/7 ~ PRESENT
Data & Web Development Intern

- Data Analysis
- Web Development

PROJECTS

LLM-Based Integrated Network Intrusion Detection & Alert System
Built a **Docker**-based IDS using **ALBERT** and **CICFlowMeter** for automated malicious traffic detection and real-time Gmail alerts.

AI-Driven Energy Saving Strategy Platform for Chillers (ICAN)
Developed an **RL** and **GAN**-based synthetic data module to optimize energy-saving strategies and address industrial data scarcity.

AI-Based Traffic Profiling: Analyzing Yunlin TPASS Usage Patterns
Analyzed TRA and bus ticketing data using **PCA** and **K-Means** to identify 6 key user profiles for transit policy optimization.
